

The Solution for managing audience concentration
in the Zoom meeting

Problem

Problems with current online Zoom conference

Hard to check audiences'
overall understanding

Difficult for the audience
to respond

Audiences'
distributed concentration

Solution

LAM will
Look At Me

- 1 Instead of the speaker,
Take a look at the audiences' response to the talk
- 2 Deliver the results to the speaker in real time

Mission & Vision

Being essential
when holding an online conference
in this non-face-to-face era

Mission

Vision

To enable high-quality talk/lecture
that eliminate online disadvantages

Unique Value Proposition

Market Advantage

Just use the 'Zoom' like now!
*You do not have to
bother adapting to new things.*

Functional Advantage

What exact point of my talk
has caught the audiences' attention?

-> The Reaction Checker

I want to know the overall chart
to improve my upcoming talk!

-> The Attention Gauge Chart
